

Mensah Rubens

Full-stack Developer

I am a web and mobile developer. My job is to design solutions for the web, and for android and IOS mobile interfaces. I am able to carry out a project using the react.js and angular frameworks, the wordpress CMS or, in the case of a mobile project react native and flutter.

-Laravel
-Wordpress

Awards and Recognition

On Friday, November 4, 2022, I received the distinction of the best website as part of my end-of-study project. It involved replicating the school's website (IFRAN) while adding innovative elements. The site was coded in HTML, CSS, javascript and without framework. I invite you to visit the site at the following address:
<https://ifran.firebaseio.com/>
